To help ensure Americans have tests on hand if a need arises, the Biden Administration is purchasing one billion at-home, rapid COVID-19 tests to give to Americans for free. A half-billion tests will be available for order on January 19th and will be mailed directly to American households.

There will be free tests available for every household, and to promote broad access, the initial program will allow four free tests to be requested per residential address. Starting January 19th, Americans will be able to order their tests online at COVIDTests.gov, and tests will typically ship within 7-12 days of ordering.

To ensure equity and access for all Americans, the Administration will also launch a call line to help those unable to access the website to place orders, and work with national and local community-based organizations to support the nation's hardest-hit and highest-risk communities in requesting tests.
