## Borrowing History

Borrowing History is not enabled

Enable this feature to keep a private record of items you borrow from the library

[Enable Borrowing History](#)

To get to your Borrowing History, click on your username in the upper right of the screen, then select your Library Dashboard. Select “Borrowing History” from the left-hand menu on the Dashboard. When you first register, you need to turn on your borrowing history in order to track what you have read. This tracks from the point you turn it on, and will not track anything before that point.

Unfortunately, your Borrowing History cannot be searched and cannot be sorted if you have over 100 titles. This is due to the fact that this information is not stored on the catalog servers, but is pulled from the library system each time it is loaded. A way around this is to add items from your Borrowing History to your Completed Shelf:

- On your Borrowing History Page, select “view all Borrowing History:”

### Recently returned

The following items were recently returned to the library.

- Then, go through the list and hit the “Completed” button for each item:

- This will take some time to complete depending on how many items are in your Borrowing History, but the completed shelf is not limited in its sorting.
